A Good Book that All Students Should Read

“A great book should leave you with many experiences, and slightly exhausted at the end. You live several lives while reading.” – quote from William Styron. Have you ever read a book like this? I recommend “Danny the Champion of the World”, a book written by Roald Dahl for all students to read. It is suitable for primary students, encourages them to be imaginative, and brings an important message for parents in future.

To start with, this book is suitable for primary students. Everyone can read this book. Its vocabulary isn't complicated; however, it has an interesting and special plot, which isn't an ordinary experience. It is neither violent nor too childish, and there are humorous, mysterious, and unexpected moments in this wonderful book which makes it thrilling to read.

Next, this book encourages students to develop new ideas. The main character Danny thinks of an incredible idea that started an adventure. We should learn from this, and think of ideas as well. This is significant because we would not have any modern technologies or inventions without the generation of ideas at first. This book can motivate children to be imaginative, just like Danny.

Last but not least, “Danny the Champion of the World” is a book that brings an important message. “What a child wants and deserves is a parent who is sparky.” This quote from the book tells students not to become boring and strict parents when they grow up, but to be full of excitement. This inspires children and more importantly, makes them happy. Just like Danny, it could even bring an unforgettable adventure. On the other hand, if parents do not give children sufficient entertainment, children would be miserable and blue. Therefore, this book tells children to be an amusing parent when they grow up.

To summarize, I fully recommend all primary students to read “Danny the Champion of the World”. This book is suitable for primary students, motivates children to think out of the box, and tells parents to be cheerful to their children. There is no doubt that “Danny the Champion of the World” is a fantastic book that every student should read. What are you waiting for? Go and read this exciting book!
